DETAILED ACTION

Claims 1-25 and 32-51 are pending.

Response to Amendment

The amendment filed September 3, 2008, has been received and entered. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-11, in the reply filed on November 8, 2007, is acknowledged.

Claims 12-25 and 32-51 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 8, 2007.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by CN 1137030, cited on enclosed PTO-1449 Form.

Claims are drawn to a composition comprising keratin and metal ions and preservative components (e.g. ammonium compounds).

CN 1137030 teaches a composition comprising keratin and metal ions and preservative components (e.g. ammonium compounds).

The claims are identical to the teachings of CN 1137030 and are, therefore, considered to be anticipated by the reference. Keratin is universally derived from hair, feathers, etc., and hence the source of the keratin even if silent in the reference is an inherent feature of the teachings in the reference. Also ammonium components are preservatives and even if the reference may be silent with respect to the tetraalkylammonium hydroxide it is inherent to the teachings of the reference because its structure is comparable to those disclosed by the reference.

Response to Arguments

Applicant's arguments filed September 3, 2008, have been fully considered but they are not persuasive. The argument that the reference does not describe a composition comprising a hydratable protein is noted, however, the reference does disclose keratin as the source of the soil amendment product and Applicants' claims do not necessarily omit the presence of amino acids. Furthermore, amino acids are cationic species because they can carry a charge in dissociated form. Also the claims are not necessarily limited to a keratin hydrogel. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a hydratable keratin comprising oxidized or reduced disulfide bonds, and separated protein strands or intraprotein links and

having backbone peptide bonds essentially unbroken or intact and which the intact protein form a polyelectrolyte which absorbs water to obtain protein gel) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
